El Corte Ingles (Spain) 2015 - 2017

Customer-facing experience, sales support for marketing initiatives, and gaining insights into consumer behavior.

COVER LETTER

Dear Recruiting Team,

As a Spanish student in the field of Digital Marketing and Web Development, I am currently living and studying for my Master's degree in Cologne. My studies are conducted online in the evenings (from 4:00 PM to 7:00 PM), which allows me significant scheduling flexibility and a strong desire to engage in practical work within a corporate environment.

As part of my curriculum, I have successfully completed both the Digital Marketing and the Full-Stack Web Development modules. I work with HTML, CSS, JavaScript, React and TypeScript on the front end, and with Node.js, Express and MongoDB on the back end. For my final project I built Vagamundo, a complete web app with its own API, bookings and a statistics dashboard. This combination of marketing, technology, and web development forms the foundation of my professional interests, particularly in Digital Transformation, Strategy, and Digital Business Models.

I am currently based in Cologne but am flexible regarding my work location. I am open to relocating if required, provided there is a lead time of approximately three months to ensure an organized transition.

I consider myself a fast learner, flexible, and dedicated individual who views new challenges as opportunities for growth. Thanks to my international background, I am a native Spanish speaker with very strong German skills, enabling me to communicate confidently in international settings. I am particularly motivated by the opportunity to dive into new areas, gain hands-on experience, and grow both professionally and personally. I look forward to joining a motivated team, taking on new challenges, and applying my skills in a practical environment.

Thank you for your time and consideration. I look forward to the possibility of introducing myself in a personal interview.

Sincerely,
Marta Alarcón Rodríguez

ABOUT ME

IF YOU'VE MADE IT THIS FAR, PERHAPS YOU'D LIKE TO GET TO KNOW ME A LITTLE BETTER.

I am a creative and curious person with a deep interest in the intersection of technology, communication, and digital growth. My professional path has been intentionally diverse, as I decided to pivot my career toward Digital Marketing and Web Development.

This change stems from my desire to merge my creative interests with digital and technical skills, evolving within a future-oriented sector. I view this step as a chance to redefine myself both professionally and personally and to grow continuously.

Beyond my studies, I am particularly interested in psychology, body awareness, somatic processes, and the mind-body connection. In my free time, I enjoy reading, attending concerts, and engaging in creative activities such as dance, ice skating, fashion, design, and interior decoration.

I would describe myself as an open, creative, and eager-to-learn individual who sees change as an opportunity and adapts quickly to new environments.
